EDUCATION

VISHWAKARMA INSTITUTE OF TECHNOLOGY Pune, India
B.Tech Information Technology – CGPA: 8.70 / 10 2022–2026

SKILLS

Programming Languages : Java, Python, JavaScript, SQL
Data & BI : ETL, Power BI, Pandas, NumPy, Data Cleaning & Transformation
Web Development : HTML5, CSS3, ReactJS, NodeJS, ExpressJS, Flask, Django, REST APIs
Core Subjects : DSA, OOP, DBMS, Operating Systems, Computer Networks, Machine Learning, Deep Learning
Tools & Platforms : Git, GitHub, MongoDB, MySQL, Postman, VS Code, Docker, Linux, PyTest

WORK EXPERIENCE

AI Research Contractor July 2026 – Present
Handshake AI (Remote) Python, Docker, PyTest, Bash, Linux CLI

- Build containerized evaluation environments to benchmark autonomous AI coding agents on real-world tasks.
- Develop and iterate task submissions in data science/reporting and security/DFIR domains, writing task specifications, reference solutions, and PyTest-based verification suites.
- Navigate the full submission pipeline from proposal through automated and human review, refining tasks based on reviewer feedback.

Data Analyst Intern April 2025 – June 2025
Edunet Foundation (Virtual) Python, SQL, Power BI

- Built an ETL-style workflow in Python (Pandas, NumPy) to clean, transform, and load a 7,044-record retail dataset, reducing manual processing effort by automating repetitive data prep steps.
- Designed and wrote SQL queries using joins, subqueries, and aggregations across multiple relational tables to support efficient data extraction and reporting.
- Applied basic data modeling principles to structure the cleaned dataset for downstream use, then built interactive Power BI dashboards translating raw data into decision-ready visualizations.

PROJECTS

Ride-Hailing Data Analysis & Visualization (Ola) | GitHub May 2026 – June 2026
SQL, Power BI, ETL

- Analyzed 103,000+ Ola ride-booking records using SQL to evaluate booking success rates, cancellation trends, and revenue by payment method.
- Wrote SQL queries to identify top cancellation reasons across drivers and customers, and to segment top customers by total booking value.
- Built an interactive Power BI dashboard to visualize booking trends, payment methods, and driver/customer behavior for data-driven decision-making.

Automated Multimodal Compliance Orchestrator | GitHub February 2026 – April 2026
Python, LangChain, LangGraph, FAISS, Ollama

- Designed an end-to-end data pipeline (extract → transform → load) to ingest OCR text, policy documents, and video transcripts into a structured, queryable format for automated compliance verification.
- Implemented a RAG-based semantic retrieval pipeline using embeddings and FAISS vector search to improve contextual understanding and reduce hallucinations.
- Designed LangGraph-powered workflows integrated with Ollama-based local LLMs to generate structured compliance reports with timestamped evidence and regulation mapping.

Thumblify – AI Thumbnail Generation Platform | GitHub March 2026 – April 2026
MongoDB, Express.js, React.js, Node.js, Gemini API

- Built and deployed a full-stack MERN application with RESTful API architecture, separating concerns across Express.js route handlers, MongoDB schemas, and React component layers.
- Integrated Gemini API into backend service layer with error handling and structured request/response parsing.
- Built responsive frontend interfaces using React.js and TailwindCSS, managing state and API calls across multiple workflows.

RESEARCH & CERTIFICATIONS

- 🔗 **Published Researcher** – Published 5 peer-reviewed research papers across IEEE, Springer, and Elsevier in Machine Learning, Deep Learning, and Biomedical Image Analysis.
- 🔗 **HackerRank SQL (Advanced)** – Achieved 3-Star rating and ranked in the top 10%.
- 🔗 **IBM DevOps and Software Engineering Professional Certificate** – 2025.
